

Research Interns

Renewable Analytics seeks up to two research interns to help researching industry information about companies active in the photovoltaic supply chain.

The internship should start no later than September and last for three to six month.

Opportunity does exist for further employment.

Work location: Sulzbach (near Frankfurt)

Responsibilities:

- Support research on market participants along the whole photovoltaic supply chain
- Collect data on major market participants and document
- Create company profiles
- Identify relationships between market participants
- Present findings on a regular basis

Qualifications:

- Intellectual curiosity about renewable energy, solar, and supply chain research.
- Complete fluency in English (Spanish, Italian and French a strong plus)
- Working knowledge of Microsoft Word, Excel and PowerPoint
- A well-organized, detail-oriented approach to work
- Raw intelligence
- High level of motivation, self starter
- The ability to juggle multiple tasks effectively

In return for their participation, interns receive a 500,- EUR monthly salary and a rare on the ground education in the solar industry.

Applications including cover letter and CV should be send to dirk.morbitzer@renewableanalytics.com
